

Atsushi Kato

General Manager, Environmental Systems Group of Mitsubishi Heavy Industries Europe Ltd., (MHIE) 100% owned subsidiary of Mitsubishi Heavy Industries Ltd., (MHI) with international multi-disciplinary experiences in development and delivery of major capital projects across energy and petro-chemical industry sectors.

He has worked for MHI for 11 years to implement solutions, gaining experiences in full project life cycle from conceptual to operation in energy and petro-chemical sectors.

From 2006, he leads business development and licensing of MHI CO₂ capture technology in Europe, US and Middle East region. He has been in charge of licensing of MHI CO₂ capture technology to chemical industries and also has worked for pilot and demonstration projects in energy sector.

From December, 2008, he has been assigned as General Manager of Environmental Systems Group of Mitsubishi Heavy Industries Europe (MHIE) based in London and in charge of European operations of MHI Environmental Systems mainly in CCS.

Current responsibilities are:

- European business strategy development
- leading development of MHI post combustion CO₂ capture technology in European region
- External stakeholder management, including discussions with regulatory authorities as well as other stakeholders.
